International Trading Co. LTD

After pushing the e-board to nearly 70kph, professional e-board and wake-board instructor Craig Wright said:

"...there is nothing else out there that even comes close to the X-Jet, it has such power and agility. I've ridden them all and the X-Jet sets the new standard"

When it comes to handling, ride stability, planing efficiency and hydrodynamic performance...

...nothing comes close to the X-Jet™ Xtreme

Leading Hydrodynamic Performance

The X-Jet™ excels in hydrodynamic performance and stability with its 2 center keels and 2 side chines/fins, ensuring straight-line stability and efficient power usage while planing. The hull design minimizes friction and maximizes lift. The shielded motor enhances protection and efficiency, allowing for effortless gliding even when throttle is released.

Pro 2 + 1 Thruster Fin System

The e-surfboard features three fins: two side thruster fins and one center fin. The side fins have FCS II (FCS2) quick-release mounts for easy interchangeability. This setup offers stability in various conditions, catering to surfers of all levels, and studies indicate it offers superior stability and maneuverability.

Built-in Jet Drive Protection

The X-Jet's motor is fully concealed within the board, offering protection from collisions and enhancing hydrodynamic performance. This design also eliminates the braking effect of exposed jet drives, and allows for optimal stability and control with the attachment of the main center fin.

Overall, the iAQUA X-Jet™ e-surfboard is the No.1 choice for high-performance, versatility, and durability.

Whether you're a beginner or advanced rider, its innovative features and cutting-edge technology promise an unmatched surfing experience, backed by iAQUA's expertise and reputation for quality.

Technical Specifications

Body material	100% Carbon Fibre	Operating Range	25km - 40km
Maximum power	20kW	Operating Time	40m - 1h 20m
Power levels - 4	25% Beginner 50% Intermediate 75% Advanced 100% Expert	Min and max typical usages depending upon rider weight, power level setting and sea conditions.	
Top speed	Up to 68kph	Charge time to 80%	2h 30m
Battery voltage	72V	Charge time to 100%	3h 30m
Battery capacity	3670Wh	Fast battery charger included	Yes
Battery protected by LithiumVault™	Yes	Board length	1800mm
Wireless remote/throttle	Yes	Board width	630mm
Wireless remote/throttle charger	Yes	Volume / displacement	60 litres
Emergency magnetic kill switch/leash	Yes	Max rider weight	160kg
Balance/control leash	Yes	Weight including battery	43kg
Adjustable, multi-position foot straps	2	Weight excluding battery	23kg
Fins (2 + 1 thruster system)	1 x Black central carbon fibre fin 2 x Red side fins utilising FCS 2nd generation fin mount		

"Making power turns, flips, jumps, insane acceleration, and near vertical carving turns, the X-Jet is a thousand times more fun than a hovering 'feel nothing' foiling board"

World Champion Surfer
Anissa Flynn

Packages

X-Jet™ Xtreme

Including: wireless throttle and balance leash, 3,670Wh high capacity battery, sure-grip top deck, powerful 20kW iet drive and 2 x adjustable foot holds **\$12,690**

Transport Kit

All-terrain transport wheels, Deluxe carry bag and X-Jet™ Stand.

\$995

X-Jet™ Xtreme + Transport Kit

Our most popular package, buy them together and save nearly

\$13,130

X-Jet™ Xtreme + Transport Kit + Extra Battery

Perfect for when you never want to stop the action. Even though the X-Jet has the biggest battery of any E-board it still needs charging, so with this package you'll always be able to keep one battery on charge for constant all-day riding.

\$17,875

Accessories

X-Jet™ Deluxe Carry Bag \$645

Made of tough padded nylon your X-Jet™ will be well protected. Internal pocket and exterior side pocket. Shoulder strap plus, 3 grab handles for easy lifting and wheeling. Rigid base for motor protection.

In-built wheels for easy transport.

All-terrain Transport Wheels \$425

With large rubber wheels and large non-slip cushion pads, these all-terrain wheels clip around the e-board (or X-Jet™ in Deluxe Carry Bag) in seconds and are perfect for beach or tarmac. Add two, front and back, and turn the X-Jet™ into a carrying trolley, for extra batteries, gear and beach bag etc.

Extra 3,760Wh Battery \$5,190

Complete with the X-Jet™ quick-release secure-lock handle, and protected by the LithiumVault™ lithium battery shield.

X-Jet™ Stand \$175

With large rubber pads your X-Jet will be held securely. You can position the e-board face up or down convenient access. Lightweight, strong and portable with easy twist to erect/close system. Fits inside the X-Jet's carry bag.

**2-YEARS
WORLDWIDE
WARRANTY**

All prices in Euros and do not include sales tax or delivery charges. Delivered from inventory located in our European warehouse.

The all new iAQUA X-Jet™ Xtreme... The world's fastest, most powerful, and most versatile electric surfboard.

Ideal for the both beginners and advanced riders alike with 4 power levels. Here's a detailed overview of its features:

Power Levels

With 4 power level settings the e-board is suitable for both beginners and advanced riders, offering four distinct power levels to accommodate different skill levels, or styles, from touring, to racing or freestyle acrobatics.

Powerful Jet Drive

Powered by iAQUA Racing Technology, X-Jet is equipped with a 20kW high-performance jet drive, fully enclosed for maximum hydrodynamic efficiency. Our closest competitor delivers just 11kW of power.

**JET
20KW
DRIVE**

Sure-Grip Top Deck

The full-length padded top deck ensures a secure and comfortable grip, essential for maintaining balance and control, and comfort for long distance rides standing, seated or lying down. Take off the foot holds and its a comfortable deck for lying and seating, and great fun when two-up or having fun taking the kids for an adventure.

Protected by the LithiumVault™

iAQUA's batteries are already the safest in the industry. Our cells are from CATL (the same company the supplies TESLA). We have now added extra protection from LithiumVault™, a Kevlar® jacket wrapped around the battery that contains an uncontrolled thermal runaway fire, and effectively reduces the severity of any lithium fire by up to 95%.

3,670Wh High Capacity Battery

Powered by a large 3,670Wh battery. This impressive combination is double the power and capacity of most of our competition and allows for blistering performance, extended use, and huge value as standard. Compared to our closest competitor they provide a standard battery of 1,900Wh, about half of the X-Jet™ Xtreme's. They then charge a premium price for their larger 2,900Wh battery which is still 21% less than the X-Jet's.

**HIGH
CAPACITY
3670Wh
BATTERY**

Range and Speed

On a single charge, the iAQUA X-Jet™ can cover a distance of more than 30 kilometres. Moreover, it's renowned as the world's fastest electric surfboard, reaching top speeds up to 68 kph.

Wireless Throttle and Balance Leash

The wireless throttle is effortless to use and gives a real sense of freedom, plus the forward leash makes the board super-easy to ride, giving extra control and comfort for long-distance riding or precise handling in tight turns and acrobatics.

Low Weight: The e-board weighs just 23 kg, excl. the battery, making it one of the lightest in its category.

Adjustable Foot Holds

Supplied with two removable, fully adjustable and cushioned foot holds, facilitating quick turns and acrobatics for a thrilling ride.

**100%
CARBON
FIBRE**

Construction

Made from full carbon fibre, the surfboard is lightweight and also exceptionally strong, ensuring both performance and durability.

Safety Features

As well as the present power levels, the X-Jet™ also includes a magnetic kill switch, enhancing safety by allowing immediate shut down of the e-board in case of fall. When you re-mount it takes just a second to clip the mag-mount back in.

Class Leading Buoyancy

The X-Jet™ sets the standard again allowing up to 160kgs to be carried, which allows you to take two riders at the same time. Super fun for friends or to take your children.

4 x Grab Handles

The e-surfboard is equipped with 4 carbon-fibre grab handles. Most other manufacturers save the expense of these, but these grab handles (two front and two rear) are crucial. First they facilitate easy carrying, or transportation/pulling the X-Jet™ on wheels front or rear. They also offer strong hold points for climbing onto the e-board, or holding and positioning it in choppy conditions or surf. Plus they are perfect grab handles when riding with your kids.
